## Trim-A-Table™

By Van Mark Products

When it comes to cutting gables, rake edges, ends and fascia, rely on Van Mark to provide you with the one saw table designed to cut precise angles fast and easy, Trim-A-Table™. Don't rely on tile cutters, snappers or worse, saw tables that cant stand up to the grueling punishment cement fiber board dishes out job after job. As pioneers of the sheet bending brake and portable slitter, you can rest assured that the best saw table you can buy for cement fiber board is as close as your nearest authorized Van Mark distributor.

NEW  
UniStand™  
Sold Separately

### Recessed Blade Track

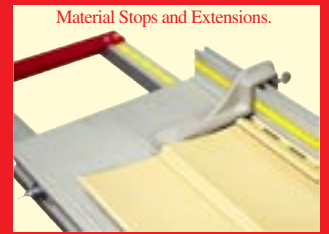

Cuts are always clean and no need to worry about cutting or scoring into bottom planks.

With the locking knob right at your fingertips, you'll never have to bend over to lock angle positions.

Van Mark gives you accessories you can really use. Material stops and extensions come standard.

Ergonomically Placed Controls.

Material Stops and Extensions.

Easy to  
Read Protractor

Lock the saw track at precise angles using the easy to read built-in protractor. Precision cuts from 3/12 on up are as easy to setup and make as aligning the indicator with the preset pitch marks on the protractor. Built-in Vinyl bearing strips prevent wear between the components ensuring a long trouble free service life.

### Trim-A-Table™ Specs.
